

AutoCAD is designed to allow architects, engineers, and construction industry professionals to create drawings and documents, including documentation, elevations, 3D plans, and section cuts. AutoCAD uses the following file format for creating and saving documents: DWG (Design Web Format) – AutoCAD extension for saved files LSP (Layered Spatial) – Layers for document,.dwg, or.dwg document types DGN (Dimensioned Graphic) – Descriptive Graphics in AutoCAD PSF (PostScript Formatted) – PostScript documents for AutoCAD 2D – 2D drawing (level 1) 2D/3D – 3D drawing (level 2) Topologically-Sorted (or Orthogonal) – Traditional 2D drawings ESRI ArcGIS – Exported from AutoCAD directly to the ArcGIS platform ESRI Shapefile – Export to Shapefile format ESRI Personal Geodatabase – Export to Personal Geodatabase AutoCAD has since been used to design and model buildings in a variety of industries, including commercial and residential construction, engineering, architectural, and construction management. Design of the Eurostar high speed rail in the UK was started with AutoCAD, leading to a high speed rail design competition in France in 2006. History AutoCAD was initially developed at the Palo Alto Computer company by its founder, Gary Kildall. Released in 1983 as DOS 4.x, it was heavily based on the innovative UI design principles of Xerox's Star computer. It had a new menu system that was a complete departure from the menus of previous products, an innovative programming environment, and a new file format: AutoCAD was the first DOS application to use a new file format, the AutoCAD DWG file, and this was the main factor in the success of the product. The DWG file format was the first to exploit the new GUIs capabilities in DOS to show, for the first time, interactive forms, not only text fields, numbers, and a few pictures. It also introduced graphic primitives, icons, symbols, fonts, and clip art to the desktop environment of DOS. All of these features were new and groundbreaking at the time. With the introduction of the DWG format, Kildall created a new program to read and write this

Internet-based applications Autodesk released in 2009 the newly developed customer experience and collaboration application, AutoCAD 360. With more than 200,000 downloads, it was the most downloaded software for MS Windows. The application creates an interactive desktop presentation for 2D AutoCAD drawings. It creates AutoCAD sheets, which are linked to web pages. It also provides opportunities to interact and collaborate in real time using a mobile tablet or other mobile device. Web services AutoCAD LT and AutoCAD have web services available for public consumption. They enable customers to utilize the services by application programming interfaces (APIs). A wide range of services and data access options are available via the web services interface. In December, a group of fans attended a meeting in Mayfair to offer advice to the working group set up by Thomas Cook after it became clear that they wanted an explicit ban. The group, which included MPs and senior figures from business, law, lobbying and government, gave advice to the working group, chaired by Brian Mole, who will report to the foreign secretary on the best way forward on the issue. It is understood that the group is now recommending a ban on the use of stun guns for the whole of the UK. One member, who was present at the meeting, said: "A blanket ban would have some wide support." A Department for Business, Energy and Industrial Strategy spokesperson said: "This issue is a matter for the Department for Business, Energy and Industrial Strategy. We remain committed to protecting consumer safety and ensuring the wellbeing of all British holidaymakers." The Home Office said it was "open minded" but had no comment on whether it would support a ban. Dawn Butler, the shadow women and equalities secretary, said the group had reported to the Brexit department and was informed "that any move to change the law would have to be agreed by the Home Office. "We would welcome progress on this issue and a clear commitment from the government to bring forward the necessary legislation to change the law, as soon as possible." A Home Office spokesperson said: "We are open minded about this issue. We have no plans to amend the law to ban the use of stun guns in the UK." Both the Travelwatch charity and the Hospitality Industry Association (HIA) have urged a government ban on the use of stun guns. A Home Office spokesperson said: "Our concern is that stun guns, which are illegal in the UK, are being carried by tourists and may be used as a deterrent to other customers. "We know that people travel abroad with these devices and this may put them in danger
