There's no shortage of adventure game clones in the App Store, but this one stands out for its thoughtful design and its depth. Developer Dynanova has created a game that's part Twine, part Beneath a Steel Sky. There's a ton of gameplay to discover in this adventure, and not even your iPhone's touchscreen can ruin the fun. Check out the trailer above to see what's in store. Gameplay Dungeon Slime 2 is free, but there's a premium in-app purchase to unlock additional items. The best adventure games are the ones that make you laugh as much as they make you cry. That's why Beneath A Steel Sky is a very good adventure game. Gameplay Dungeon Slime 2 is actually a great adventure game, too, but I find its similarity to BASS a bit off-putting. But maybe that's just me.Q: Cannot get my background color to change I'm trying to build a simple splash screen that shows the name of the device. I've got most of it working except for my background color. I can get it to change the first time it runs but on all subsequent runs it goes back to black. This is the most simple code I could find and modify so I'm sure there is something obviously wrong. public class splash extends Activity{ public static String tag = "splash_screen"; @Override public void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_splash); getWindow().setBackgroundDrawableResource(R.drawable.background); getWindow().setBackgroundColor(Color.rgb(230,230,230)); // TextView textview = (TextView) findViewById(R.id.

What's new in Dungeon Slime 2: Puzzle In The Dark Forest:

Saturday, February 21, 2015 The title of this mod says all - this works as dungeon ("dungeon" is the word I'd use for mods that include many, more or less, levels). When you're in those dungeons, you are a (level 1-30) gruff mountain man, searching for treasure with which to construct a decent house. You must also deal with evil beings that try to do evil things to you. This mod is not rolling a 10-man dungeon over several levels, or something like that. Instead, you'll find yourself in several, distributed caves running through hills, and I have made one of those caves into a multi-leveled dungeon. The dungeon contains roughly a dozen caves. Each level will start with less than 1x1 dungeon space. This means it's already hard enough to find your way through. There are steps to climbing the stairs, not to mention there's all the gaudy junk to fall over. In a multi-dungeon mod, you shouldn't have to climb up/down stairs

before descending/ascending. In this case, the very first cave/level is a bit hard to even get into, because lots of creatures attack you. By this point in the dungeon, it may be advisable to do some saves. You will be happy to find a secret passageway - do NOT let the open door trap you in there (it does, but it's easy to escape), since it leads to a dungeon within a dungeon. Sunday, January 13, 2015 I am officially announcing this mod. It is still in testing, but it should be released in near future. This mod has nothing to do with Romance of the Three Kingdoms, as far as I know. In my previous mod, the Naga Slimes had a new dungeon - the Hall of Churning. This mod also introduces a difficulty level. In Classic Mode, this mod will be a simple dungeon where you can rescue 3 sisters. The difficulty level of this mod is called Classic. In Master Mode, it will be a harder dungeon, the goal of which is to rescue each of the 4 sisters. It will be a 10-stage modified version of the original "Hall of Churning". In Queen Mode, it will be a mix of Classic Mode and Master Mode, with a later Queen stage. The Queen stage will have extra difficulties, and follow the same structure as Queen Mode. Finally, there is a secret stage - which
