Mint's experience in implementing blockchain technology in an easy-to-use online platform. "The combination of our two companies will empower customers to safely use their mobile phones for in-store and online purchases, and to have full control of their payments wherever they are," says Nazareno Fratini, CEO and co-founder of Mint. "An efficient and secure digital wallet using blockchain technology is the key to driving the adoption of mobile payments," Fratini continued. "As Mint, we have been working hard to refine and optimize our customer experience for years, while Paytag's experts in physical point-of-sale and mobile payments are currently revolutionizing their industry." "Mint is at the forefront of the development of blockchain technology, and the goal of this partnership is to combine our two companies' expertise and experience to take blockchain-based mobile payments to the next level," said Stan Storck, CEO and co-founder of Paytag. "Our partners will be combining their solutions to create an all-in-one solution for users who are looking to make in-store and online payments in a safe and secure way." About Mint: Mint is a fully licensed e-wallet that enables customers to send and receive money, track spend and store holdings for multiple financial institutions, and it does all this online. With Mint, customers can be more responsible with their money and safe at the same time
