If you do not know how to obtain Malwarebytes Premium Crack.Q: Get Mapping result without success or fail? I'm using WCF Data Services. var server = new DataServiceContext(connString); server.MapAll(m => m.Categories).ToList(); When I try to get categories with MapAll I get in result a list in which there are items that I didn't map. However, when I map only one item and I try to get it I get the empty list. How can I get the mappings without knowing what is in result? A: If you want the MappingResults, use the overload that takes an IReadOnlyQueryable. In your example code, you would create a DataServiceContext object with an empty graph, then use the.ToReadOnlyQueryable() method. Update I misread your question and misunderstood that you wanted the mapped categories, but I believe this is what you are asking: This will give you the list of all categories from the auto-generated dbml, but don't assume that the MappingResults are complete. Take a look at this MSDN article to see the limitations. var server = new DataServiceContext(connString); var q = server.CreateQuery().AsQueryable(); var results = q.ToMappingResults(); foreach (var r in results) Console.WriteLine(r.Name); Update 2 If you want to create a list of items that have been mapped, you could create a helper method. var results = MappingResults.GetItems().To
